## ABOUT EUROMIX™

For over 30 years, Euromix™ has been synonymous with render. This reputation is based on our commitment to innovation, maintaining the highest quality standards and investing in cutting-edge research and development. Euromix™ Render Systems allow you the flexibility to realise your most demanding designs, whether flat or curved, concave, or convex, white, or vibrantly coloured.

By specifying Euromix Renders, you avoid the problems associated with conventional cementitious renders, such as cracking and colour fading. Specify Euromix™ and you can be sure of a beautiful solution that will stay looking good for years – an attractive prospect for developers and end users alike.

EUROMIX™ RENDERS		Size	Pack	Coverage (m <sup>2</sup> )
	<p><b>Euromix™ Render (AS1530.1 Compliant)</b></p> <p>Euromix™ Render is a versatile cement-based render suitable for application by hand over most substrates, in residential construction, as a low/medium build base coat. Render can also be float or sponge finished as a topcoat.</p> <p><b>*now in weatherproof packaging!</b></p>	20 kg	56/pallet	Depending on thickness 4mm; approx. 3.5m <sup>2</sup> per bag
	<p><b>Euromix™ Cream Render (AS1530.1 Compliant)</b></p> <p>Euromix™ Cream is a cement-based render that is best suited as a medium/high build base render over a wide range of substrates in both residential and commercial buildings. Usually applied by hand, Cream Render can also be sprayed over masonry substrates.</p> <p><b>*now in weatherproof packaging!</b></p>	20 kg	56/pallet	Depending on thickness - 4mm; approx. 3.5m <sup>2</sup> per bag  Application: by hand or projection machine (on brick/block)
	<p><b>Euromix™ Skim Coat (AS1530.1 Compliant)</b></p> <p>Euromix™ Skim Render is designed to be used as a finishing coat over base render or other finished surfaces. Euromix® Skim can be applied in thicknesses from 2 to 3mm and be floated to a smooth flat finish or sponged to give an even textured finish.</p> <p><b>*Now in weatherproof packaging!</b></p>	20 kg	56/pallet	By hand only: 2-3mm Application: Sponged, smooth or float  Coverage; At 2-3mm, will cover 6- 8m <sup>2</sup> per bag
	<p><b>Euromix™ FP Render (AS1530.1 Compliant)</b></p> <p>Euromix™ FP Render is quick curing dry mix, full polymer, and cement render – no added bond required in mixing. Particularly suitable for application over sheet and panel substrates, like AAC, polystyrene (EPS), fibre cement (FC) and plaster-based materials. Euromix™ FP Render is also suitable for application over masonry substrates.</p> <p><b>*now in weatherproof packaging!</b></p>	20 kg	56/pallet	Coverage: At 4-5mm approx. 3.5m <sup>2</sup>  Application; by hand or projection machine
	<p><b>Euromix™ LWHB (High Build) Render</b></p> <p>Euromix™ LWHB Render a full polymer render that can be applied by hand or machine, as a high build base coat over most substrates in a residential or commercial building. Particularly suited to rectification of misaligned and/damaged substrates. High adhesion allows high build thicknesses due to special low weight fillers and chemicals. <b>Boasts up to 30mm in one application! *</b></p>	15 kg	56/pallet	Coverage: At 10mm, 1m <sup>2</sup>  Application; by hand or projection machine
	<p><b>Euromix™ NPS Keycoat Render</b></p> <p>Euromix™ NPS Keycoat Render is a full polymer render that can be applied by hand or machine, as a medium build base coat over nonporous substrates, like PVC, EPS, and Fibre Cement. Suitable as a keycoat on difficult substrates where other renders cannot be used.</p>	20 kg	56/pallet	Coverage: At 4mm, 3-5m <sup>2</sup>

EUROMIX™ BOND		Size	Pack	Mixing Ratio																
	<p><b>Euromix™ Bond</b></p> <p>Euromix™ Bond is a liquid additive formulated to increase the adhesion, compressive and chemical strength of Euromix Renders. Bond is added to water in various ratios dependent on the type and condition of the substrate (to form a ‘gauge’).</p>	5 Lt 20 Lt 120 Lt	32/pallet 4/pallet	<table><tr><td>Substrate</td><td>Ratio</td></tr><tr><td>Clay Bricks</td><td>1:19</td></tr><tr><td>Cement Bricks</td><td>1:15</td></tr><tr><td>Concrete</td><td>1:9</td></tr><tr><td>Calcil</td><td>1:15</td></tr><tr><td>AAC</td><td>1:9</td></tr><tr><td>EPS</td><td>1:4</td></tr><tr><td>FC</td><td>1:4</td></tr></table>	Substrate	Ratio	Clay Bricks	1:19	Cement Bricks	1:15	Concrete	1:9	Calcil	1:15	AAC	1:9	EPS	1:4	FC	1:4

EUROMIX™ JOINTING & PATCHING		Size	Pack	Coverage (m²)																
	<p><b>Euromix™ Patch Coarse</b></p> <p>A pre-mixed, water based, jointing and patching compound manufactured with premium quality fillers and polymers. Patch Coarse is ideal as a patching compound and as a pre-mixed polymer render where lower builds are required.</p>	5 L 15 L	50/pallet 32/pallet	<p>When applied as a topping (1mm) 13 to 15 m²</p> <p>As a jointing compound 75 lineal meters.</p>																
	<p><b>Euromix™ Patch Fine</b></p> <p>A water based, fine build, topping and patching compound manufactured with premium quality fillers and polymers. Euromix™ Patch Fine is ideal for rectification work, facing-up and general preparation of substrates that require a smoother, fine topcoat finish (particularly where paint is to be applied).</p>	5 L 15 L	50/pallet 32/pallet	<p>As a topping, 25-30 m²</p>																
EURALBI® WHITE-SET PLASTERS		Size	Pack	Coverage (m²)																
	<p><b>Euralbi® Plus</b></p> <p>Euralbi® Plus has been designed for use as a ‘stand-alone’ white set or as the base coat in a two-component system where Euralbi® Fino topcoat is used to provide a finer set finish.</p> <p>Made in Spain.</p>	24 KG	48/pallet	<p>At 10mm thick, 2 m²</p> <p>At 1mm thick, approx.20 m²</p>																
	<p><b>Euralbi® Fino</b></p> <p>Euralbi® Fino has been designed for use as a fine finish, white set topcoat. Fino works best as the finishing coat applied over a Euralbi Plus base coat.</p> <p>Made in Spain</p>	23 KG	48/pallet	<p>At 1mm thick, 30-40 m² from one coat</p>																

EUROMIX™ PRIMERS		Size	Pack	Coverage (m <sup>2</sup> )
	<b>Euromix™ NPS Primer</b> Euromix™ NPS Primer is a solvent free primer, designed specifically for use on non-porous surfaces, like, PVC, metal, glazed bricks, high density concrete and most fired tiles. NPS Primer provides an excellent base for the application of Euromix renders, textures, and paints over nonabsorbent surfaces.	15 L	32/pallet	General coverage, 1 litre per 10 m <sup>2</sup> on general smooth surfaces.
		15 L	16/pallet	15L, undiluted, will cover approx. 90 m <sup>2</sup> .
EUROMIX™ TEXTURES		Size	Pack	Coverage (m <sup>2</sup> )
	<b>Euromix™ Fine Coat Texture</b> Euromix™ Fine Coat Texture Coating is manufactured with the <b>finest</b> small round grain sand (0.5mm approx), designed for decorative finishing over Euromix™ Renders and other substrates. This premium quality, flexible and durable coating offers a small sparkle effect, excellent water resistance and provides a 'new weathered stone' appearance.	15 L	32/pallet	up to 17 SQM per 15 L bucket.
		15 L	32/pallet	up to 15 SQM per 15L bucket
	<b>Euromix™ Sand Finish Texture</b> Euromix™ Sand Finish Texture Coating uses a <b>large</b> round sand grain (typically 1.2mm) that retains the same flexibility, durability, and water resistance properties as Fine Coat and Sandstone. Providing a more traditional texture look finish, it is suited to both commercial and residential applications.	15 L	32/pallet	up to 14 SQM per 15L bucket
